

# TAUTLINER GATE SUSPENSION SYSTEM

**SUPER NEW AFFORDABLE SYSTEM**

**SLASHES MANUAL LIFTING OF**

**TAUTLINER TRAILER GATES, CUTS**

**OPERATOR RISK, AND MINIMISES**

**POTENTIAL LOSS AND DAMAGE.**

GateSkates take the load - not the operator - greatly reducing the risk of injury

Eliminates the expense and inconvenience of gates being accidentally left behind

## **Why GateSkates?**

- Less heavy manual handling by driver. Simply lift and slide, slide and lift
- Accelerate loading/unloading
- Gates always attached to trailer - no leaving gates behind, no forklift handling required
- Eliminates over-balancing when handling gates
- Safer for driver - safer for trailer, gates and curtains
- Dramatically lower potential for vehicle, curtain and gate damage

050/E13

## What are GateSkates?

- Cable gate hangers supported at top by a four wheel carrier running on a roof-mounted track (in most cases, an existing track)
- GateSkates feature high strength cable with customised heavy duty end fittings for dependable gate support
- Two 'U' bolts make quick work of attaching gates
- Optional snap hooks make them removable
- GateSkates cabling covered in thick coloured plastic sleeving to protect cable and valuable curtains
- GateSkates are fully customised for use on existing tracks or a variety of other track types you may wish to install

take a load off your back  
& a weight off your mind
